

Additional... NOTICE DOCUMENT — to Judge Levy to be filed in 5:22-mc-51723

ALERT - to Judge Levy that this instant NOTICE to your court is meant to be PART of my IFP request as to 6th Circuit Court of Appeal #22-2042 (e.g. see ECF Doc. #2269 [which was apparently mistakenly filed by me in FWC #16-cv-10444 pertaining to Ecf Doc. #1003 in FWC #17-cv-10164] whereby I was instructed to file my IFP request in the DISTRICT COURT by the 6th Circuit Court of Appeals case manager [Amy Gigliotti]

For ease of reference.... see the caption below:

*From: Melvin Jones Jr.
1935 Hosler St. - Flint, Michigan
48503 [and] previous address: 829
Campbell St - Flint, Michigan 48507*

*Please also see the attachments affixed hereto....
[simply put]: an additional QUESTIONS for the
district court which [I] have are;*

- *Wouldn't it be VERY practical for the US EPA to have — “inspected” what it/ the US EPA expected as to the LEAD SERVICE LINE REMOVAL PROJECT AS TO THE CITY OF FLINT ?*
- *For example.... That is to say ---- TRUST, but verify {e.g. especially THE CITY of Flint keeping in mind the FACTS as to the FWC --- that is to ask, DOES THE US EPA have dirt digging heavy equipment ???} .*
- *Also, is it NOW (e.g. as a matter of Judicial Economy — and clarity to the JURY) that the US EPA is held to answer at trial along with VNA, and LAN.... ???*
- *but SADLY --- the defense for BOTH Veolia North American and LAN are made 100% correct; that is GOVERNMENT "failure" at every-level. So --- here, IF LK Law Firm is reading my emails.... yep, of course a TRIAL with all three non-settled defendants will more likely than not yield a verdict against AT LEAST one defendant. 🤔🤔💎*

Thank you for taking the time to consider my request for leave to file — although such appears to BE MANDATED BY THE 6th Circuit Court of Appeals in appeal #22-2042 — ... please provide the courts’

response and/ or order regarding my request for leave (i.e. as to my IFP request).... IN LARGE PRINT, and whereby your clerk and/ or the clerk's office sends such to [ME] via email... to ensure that I receive it.

Respectfully Submitted,

November 22nd, 2022

Good late evening - Jack Pantziris,

Just a friendly suggestion for the US EPA going forward. Maybe as PART of your new multimillion dollar Title VI "program".... this stuff that follows and is attached (e.g. although I have NOT read most of such).... WILL help the EPA become the premier agency which I am

informed that the current presidential administration has stated is the GOAL. That is to say ---- TRUST, but verify {e.g. especially THE CITY of Flint keeping in mind the FACTS as to the FWC --- that is to ask, DOES THE US EPA have dirt digging heavy equipment ???} . Also, I would NOW be shocked if the US EPA is NOT held to answer at trial along with VNA, and LAN.... but SADLY --- the defense for BOTH Veolia North American and LAN are made 100% correct; that is GOVERNMENT "failure" at every-level.

So --- here, IF LK Law Firm is reading my emails.... yep, of course a TRIAL with all three non-settled defendants will more likely than not yield a verdict against AT LEAST one defendant. 🤔🤔🤔.

A novel method for quickly and quantitatively measuring aqueous lead in drinking water has been developed. A commercially available activated carbon felt has been found to effectively capture lead from tap water, and partnered with X-ray fluorescence (XRF) spectrometry, it provides quantitative measurement of aqueous lead in drinking water.

Specifically, for a 2 L volume of tap water, the linear range of detection was found to be from 1–150 ppb, encompassing the current EPA limit for lead in drinking water (15 ppb). To make a reproducible and easy to use method for filtering, a 2 L bottle cap with a 1.25 cm diameter hole was used for filtering. Utilizing this filtration method, 75 solutions from 0 to 150 ppb lead gave a 91% sensitivity, 97% specificity, and 93% accuracy, and all the misclassified samples fell between 10 and 15 ppb. This method has also proved reliable for detecting calcium as well as several other divalent metals in drinking water including copper, zinc, iron, and manganese.
